# history

Recycling Band is a band from Poland which playing home-made instruments from waste.

They design and make their instruments on their own from products such as empty mineral water bottles, cans, buckets, boards, parts of old furniture, bicycles, and even hair combs. They have already made: BottleBass, BottleGuitar, BottleViolin, and "garbage instruments": drums, trumpet, and their own invention: „Klawiszon”.

Recycling Band was formed in 2011 and since then has performed in Poland as well as in Austria, Italy, France and even in Kuwait.

They play their own compositions inspired by various music styles and always look for new sounds using recycling instruments with electronic stuff.

Recycling Band is the finalist of Polish edition of TV show – Got Talent 2012.

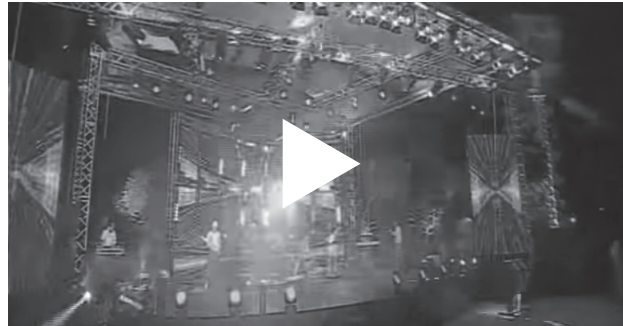

However, it had been popular before thanks to Reuters Agency, Arte TV, Discovery Channel, MSN, Chicago Tribune, TVN, TVP, RMF FM, 4 Polish Radio, Radio Eska, Radio Plus, Radio Kraków, RDN, and many eco-blogs.

The band is constantly developing and working on the popularization of music performed on instruments from waste.
